## WORK EXPERIENCE

EXPERIENCE - 0 Year , 3 Months

Supervisor

Larsen & Toubro (L&T) heavy engineering 03/2025 - Present

During my time at L&T Heavy Engineering, I was actively involved in the fabrication of internal and external pressure vessel job items. My responsibilities included interpreting engineering drawings, assisting in material preparation, and supporting fit-up and welding processes. I worked closely with senior engineers to ensure compliance with ASME standards and safety guidelines. I also gained hands-on experience in handling heavy components, dimensional inspection, and coordinating with quality control for hydro testing and NDT. Worked on fabrication and inspection of internal and external pressure vessels as per ASME standards. Assisted in reading and interpreting technical drawings and welding procedures Supported quality checks including dimensional inspection, hydro testing, and NDT (Non-Destructive Testing). Coordinated with design and production teams to ensure compliance with safety and pressure regulations. Good experience During my time at L&T Heavy Engineering.

## INTERNSHIP

Larsen & Toubro heavy engineering , 59 Days

## EDUCATION

- B.Tech - Mechanical Engineering 2025
- Charotar University of Science and Technology, Anand Grade - 6.5/10
- 12th (2021) Gujarati medium - 60.0%
- 10<sup>th</sup> (2019) Gujarati medium - 75.0%

## PROJECTS

My internship at L&T Heavy Engineering was a valuable learning experience where I gained hands on exposure to large-scale industrial operations. I was involved in various aspects of manufacturing, quality control, and project management. Working under skilled professionals helped me understand the real-time application of engineering concepts, including fabrication, welding techniques, and heavy machinery operations. I also learned about safety standards and lean manufacturing practices. The environment encouraged teamwork, discipline, and continuous learning. This internship not only enhanced my technical skills but also improved my problem-solving and communication abilities, preparing me for future challenges in the engineering industry.
